

## Favorites/Bookmarks in Edge

You can easily import your favorites from another browser and activate the Favorites Bar by clicking on the three dots and click on Settings

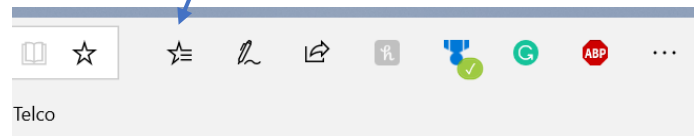

Where it says Favorites Bar be sure to slide it to on

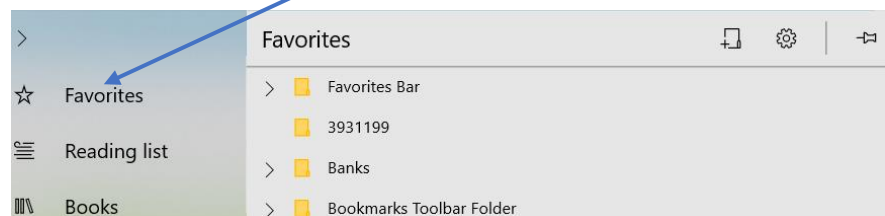

Click on Import for another browser and select the browser you want.

You will quickly get a message that all your favorites have been imported.

To see your imported Favorites, click on the odd-looking star top right

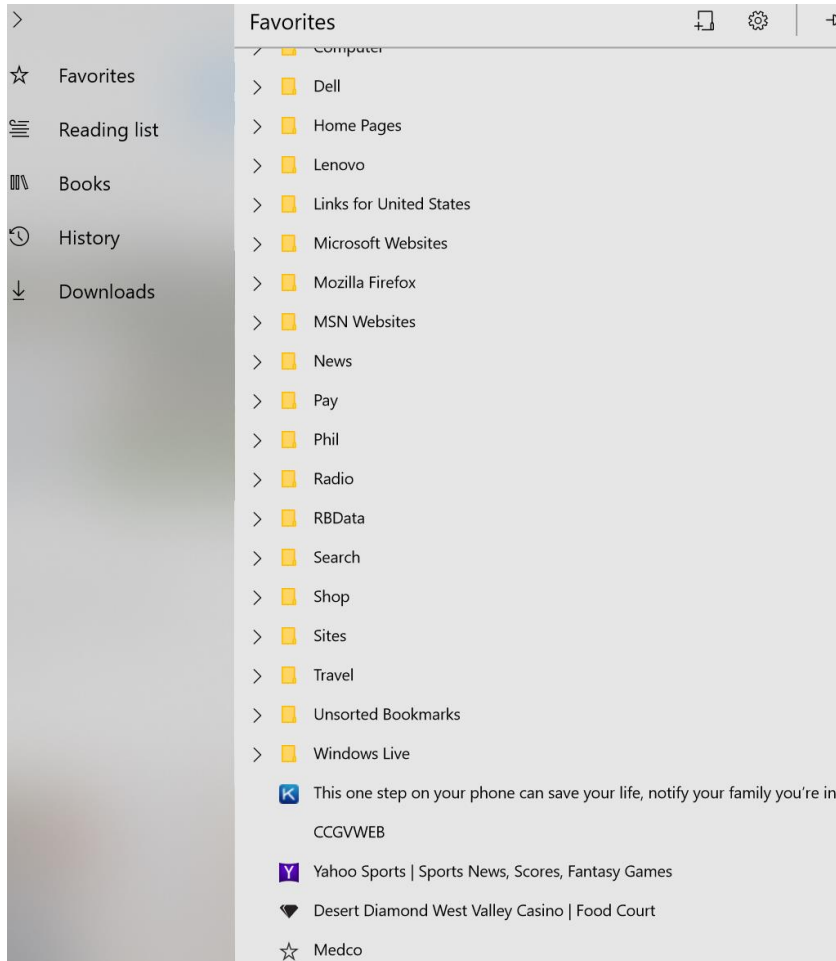

The first time you might have to click on the word Favorites to see them

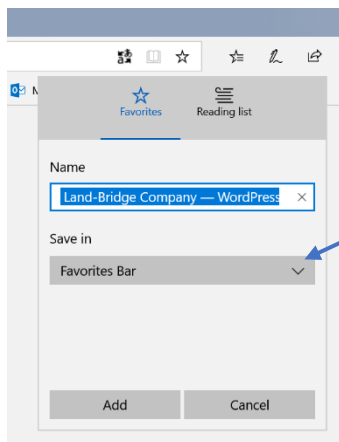

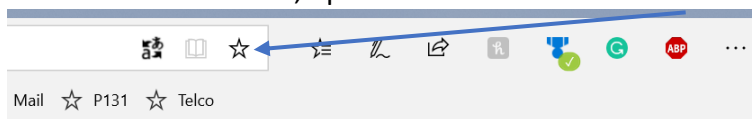

# Favorites/Bookmarks in Edge

This screen will appear showing folders first.

To add a new website, open it and click on the left star

The star will turn yellow and you will see the screen to the left

Click on the down arrow by Favorites Bar to get the screen to the right. Now you can create a new folder, select a folder to add the website, or simply add the favorite to the bottom where it automatically will be in alpha order
